CAREER OBJECTIVE:

I am a professional Software Developer with 2 years of experience in Java, can develop creative solutions. I want to utilize my expertise for the development of the company and myself.

EXPERIENCE:

TATA CONSULTANCY SERVICES

Role: **JAVA FULL-STACK DEVELOPER**

(JAVA, JavaScript, HTML, CSS, Angular, Oracle SQL)

Currently, working for **Project Commercial Management** (Finance) which handles revenue-related activities of the Organization. It is mainly used for: Creating and maintaining project-related data such as Cost Budget, Billing, Invoicing, defining milestones and revenue on monthly basis.

We specifically work on the Billing Module of the PCM system where we generate and deliver Invoices for the TCS client after a contract gets signed with TCS and project data is created in the system.

I have been designing the project's front-end screens and write business logic in Java.

ASSISTANT SYSTEM ENGINEER

(Jan 2021- Present)

- Development of third-party utility(WANI).
- Development of Credit Note creation functionality.
- Development of mail delivery scheduler.
- Created test cases on Katalon.
- Performance testing using Jmeter.
- Executed many deployments on production using Jenkins.
- Trained junior of the project by delivering various KT's.

ASSISTANT SYSTEM ENGINEER TRAINEE

(Jan 2020 - Jan 2021)

- Learned agile methodology.
- Learned about PCM (Project Commercial Management).
- Explore the life cycle of Software Development.
- Worked on UI enhancements in various frontend screens.
- Worked on various user stories for module development (Job bill rates, debit note, etc.).
- Development of job transaction functionality.

ACADEMIC PROJECTS:

(Aug 2018 - Jun 2019)

- **Title:** ATM Client Authentication System Using Biometric Identifier & OTP
- **Technologies and tools:** JAVA, SQL, Eclipse
- **Description:** Fingerprint & OTP Based ATM is a desktop application where the fingerprint of the user & OTP is used for authentication. Instead of using ATM card, Fingerprint & OTP based ATMs is safer and secure. Use the fingerprint & OTP to do banking transactions.
